

TN Printing reports 50% startup waste reduction on daily productions with eXaminer II Register Control.

Leighton, PA: TN Printing installs CC1 eXaminer II Automatic Register Control; realizes immediate waste savings.

Makeready and Paster Waste Savings

CC1, Inc. of Portsmouth, New Hampshire announces that TN Printing in Leighton, PA recently installed its **eXaminer II Automatic Register Control** on two (2) KBA Comet 4-highs. TN Printing realized immediate results following the installation with startup waste reduced by as much as 50% on their daily publications and paster spoils being down dramatically.

The eXaminer II provides tangible benefits in other areas of the newsprint production arena. Bob Miller, Project Coordinator at TN Printing, says of the installation "Now that we have the eXaminer II dedicated to establishing and maintaining register, time has been freed up for our operators to focus on other areas such as color."

Easy to Integrate and User-Friendly

Miller adds, "I was impressed with the ease of installation and the way the integration teams worked together. The start-up and training has been very thorough and our press operators have found the **eXaminer II** to be easy to use and the interface very "user-friendly".

The remote support that we have received after implementation from CC1 has been excellent! Our questions and requests have always been addressed in a friendly, professional and timely fashion."

"We are pleased with the results at TN Printing," indicates Jim Lewis, President at CC1. "The entire process at this site has been one of mutual cooperation and we look forward to our continued partnership."
